

INTEGRATION, COUNSELLING AND UPSKILLING OF MIGRANTS AND REFUGEES FROM LATIN AMERICA AND THE CARIBBEAN INTO THE LABOUR MARKET.

INTELAC MARKET PROJECT STARTS!

Aim and objectives

The inclusion of migrants in the labour market is not only crucial for their effective integration but also contributes to Members States economies. The project aims to tackle the challenge of integrating migrants and refugees from Latin America and the Caribbean (LAC) into the European labour market by bringing together experienced partners and academia and promoting a network of cooperation from countries that are amongst the most affected. To achieve this, the project aims to develop and pilot research-based educational training, as well as guidance and counselling for refugees and migrants from LAC countries to develop their potential to become active and productive members of society.

What do we want to do?

The project's expected outcomes involve a thorough and relevant comprehensive analysis and needs assessment of the challenges, obstacles and opportunities the target group faces in each participating country and a comparative study in order to successfully integrate to the recipient's country labour market. The main activities that the partnership will undertake are:

- Research study and situation analysis with the target group at the centre to project a current view of the challenges and opportunities.
- Using the needs assessment, training material will be developed and guidance for LAC will be offered.
- Publication and dissemination of the findings, as well as a continued learning and networking online platform.

Partners

1ST TRANSNATIONAL MEETING IN VIENNA!

On the 29th and 30th of September 2022, the Austrian Association of Inclusive Society received all partners in beautiful Vienna to host the first transnational project meeting of the project. During these two days, the partnership worked on the current status of the project, reviewing the planned actions and specifying the tasks to be carried out in the coming months, in order to move forward efficiently and achieve a smooth implementation of the project.
